Not a Myth but an Actuality Shown in the Returns of Agricultural Statistics and **Every Department of** Trade and Commerce.

The trade revival in Manitoba, Sas katchewan and Alberta is an actuality and not a myth. There is today a spirit of optimism in the air, just as two years ago there prevailed the opposite spirit of pessimism

A general trade revival has been felt in every department of business in the Prairie Provinces. The agriculturists are in better shape than they have ever been before in their lives. No farmers of any country are in better financial condition and in a more general state of prosperity than are the farmers of Manitoba, Saskatchewan and Alberta. The farmers have harvested a record crop-a crop which enriches them to the extent of something over \$400,000,000.

In the cities the prosperity of the country has been reflected. Everywhere business is on the hustle. The wholesalers and the retailers and the implement dealers find business good. The banks and other collection houses find collections satisfactory, and financial men declare that westerners are successes in eastern Galicia and Aus- paying up their debts. In Winnipeg the bank clearings have been the largest in history, exceeding some weeks the figures of Montreal and Toronto The grain shipments have been the biggest in the history of Winnipeg and in the history of the twin ports, Fort William and Port Arthur. The mail order houses have had a big year, the rush of fall orders exceeding all previous years and taxing the capacity of these establishments, whose most sanguine expectations have been exceeded

by the actual business done. The tide has turned in western Canada. The people of the West are forging ahead, forging ahead in actual production and in creation of wealth. giving generously to charitable and other funds, paying up their back debts, while going along carefully as regards any creation of new debts. They are economizing but not scrimp ing, acting cautiously but not miserly. The financial heads of eastern Canada. of the United States and of Europe are no longer criticizing western Canada: rather they are unstintedly offering their praise and their compliments. The financial press recognizes that the tide has turned in western Canada, and it has been published to the world.

The condition of western Canada at the close of 1915 is one of optimistic prosperity, backed by the same determination of western people to go on increasing their productiveness and maintaining the records which they pave already established.
